

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
.The use of co2 laser as a treatment method oral soft tissue pathology	ظافرة حسن مجيد الدجيلي	1	2267
Oralmadnosis with special reference to sanoking achlinical histopathological .histechemical	أحمد رضا جعفر احمد حمندي	2	2268
Secondary sjogrens sgnndrome clinical laboratory histopathological and altr .structural study	نزيه شعيبان مصطفى	3	2269
special biochemical markers for tissue injury and endothelial cell damage in saliva, serum and erythrocyte membrane pumping in systemically complicated diabetic patients	تغريد فاضل زيدان	4	2270
Micro biological immunological and histological evaluation of the effects of .Iodoform on oral bacteria and healing	فانز أحمد حسن البيرقدار	5	2271
Cytological cytognic and biochemical analysis of bechets disease and recurrent a .phthus alceration in Iraqi patients	فواز داوود عبد الرزاق	6	2272
A comparative study on the effect of gsise of ulvin and metronida zole in the .treatment of behcets disease special reference to recurrent aphthous ulceration	رجاء هادي عباس	7	2273
Serum and slivary levels proinflam matory cytokines and polyamines as .potential biomarkes	شاناز محمد غفور	8	2274
The relationship between the degree of temporomandibular joint disk .displacement to the associated painful clicking	وجناء فريد قاسم محمد	9	2275
Proinflammetory cytokines inflammatory markets some biochemical parameters .and oral indices in type I diabetic children and addescents	سرى علي احمد	10	2276
Oral health status of Iraqi diabetic patients salivary+microbial analysis	عبد الله إبراهيم حمد	11	2277
Evaluation of salivary and serum oxidative stress and neuronal damage markers as potential parametes in predication of ischemic stroke for stroke-related .diseases	كريم كطوف عطية	12	2278
Immune expression of cell cycle regulatory protein Ki-67 tumor suppression .gene P53 and Epstein	زاهدة جاسم محمد	13	2279
Immunohistopathological expression of RANK , TNF and ALP markers in giant cell tumor of bone and central giant cell granuloma of the jaw	سحر حمدان عبد الغفور	14	2280

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
Chronic periodontitis as a risk factor for ischaemic heart disease (serum and salivary investigation for oxidative stress markers lipid profile and cardiac enzyme)	الاء محمد شهد	15	2281
Study the control of recurrent oral herpes simplex infection by in vivo stimulation of saliva for the activity of antiviral hypothiocyanate	احسان عبد الله كميل	16	2282
The effect of magnetic field on bone healing and osseointegration of intraosseous implant with evaluation of its effect on some isolated oral microorganism	حسن علي محمود	17	2283
clinical Evaluation oxidatus and Apoptotic Activities biomarkers in serum and saliva of patients with oral lichen planus	اوس وليد عباس سلمان	18	2284
Clinical utility of salivary micro RNA (miRNA 125a, miRNA 200a, miRNA 93) fordetection of oral sequamous cell carcinoma	شيماء حامد مدهر علي	19	2285
oral findiongs hromonal assay and cytokines biomarakers in serum and saliva of postmenopausal women with osteoprosis	وداد فرحان جابر	20	2286
the study of oral findings and salivary biomar;ers in nucontroiied type 1 diabebents	رحاب فيصل احمد	21	2287
cilical microbological and immunological evalution of low level laser versus nystine on oral candidasis	هديل سلمان عبد الكريم	22	2288
