

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
Microleakage of three types of visible light cured compost resin restorative materials	رعد طلعت النقيب	1	1420
A study of micro leakage using composite material with bonding orgent	علي محمد كاشف الغطاء	2	1421
The shear bond strength of glass ionomercement to dentine	عامر سلمان حسن	3	1422
In vitro study of micro leakage using in cuter benzoineco in endodontic therapy	فائز عبد الله الكيلاني	4	1423
A study to determine the position of the optical of or amen in relation to the anatomical	ايمان انور ثامر	5	1424
Estimation of tooth length in Iraqi dental students using paralleling radiographic technique	روندا عمانويل جزراوي	6	1425
.Margin placement of a esthetic veneer crowns using lip posture	عبد الكريم جاسم كاظم الغزاوي	7	1426
.Clinical evaluation of anterior micro filled composite resin restorations	ايناس عيسى الراوي	8	1427
.Variation in proximal caries diagnosis treatment plan decision among Iraqi dentists	موفق صديق رشيد الحمامي	9	1428
.Variation in the morphology of the mandible first molar in Iraqi simples	لمى محمد سليم بابان	10	1429
.An evaluation of different cavity designs for class II amalgam restoration	بشرى شكر محمد	11	1430
.Effect of varnish and die spacer on the retention of complete cast crowns	عادل فرحان ابراهيم	12	1431
A study to compose the effect of chaconne chain cal preparation on the abjuration .of roof channels	مسلم محمد رضا الدباغ	13	1432
.Cusp fracture in the teeth rest orated with different restorative materials in vitro	مناضل رؤوف هادي	14	1433
A comparative study between 2 types of dental casting alloy in relation to microleakage.	عبد العتي احمد محسين	15	1434
.Isolation and identification of microorganisms from root canals of material teeth	فواد جاسم محمد العيثاوي	16	1435
Assessment of the effect of thermal stress on marginal microleakage of three types of dental amalgam alloys	سلام داود سلمان	17	1436
The effect of immediate and late finishing and polishing of composite restoration on .micro leakage	عمار عطا الله علي	18	1437

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
	بشار حسن محمد	19	1438
In vitro, an evaluation of cusp resistance to feature of posterior teeth restored with silver class	مقداد نجيب شكمكجي يحيى	20	1439
.An assessment of the use of chlorhexidire as acavity cleanser(in vitro study)	حسين فيصل حسين الحويزي	21	1440
Microleakage study of two different materials in one cavity	شذا عبد الكريم عبد الحسين	22	1441
A clinical study to evaluate the antimicrobial effectiveness of chlorhexidine gluconate solution	معتز غازي الشيخ علي	23	1442
.A study to compare different methods used for debridement of cured root canals	ميسون محمود عرب سعيد	24	1443
A study to evaluate the effect of venting on the marginal adaptatation of full cast crowns	طلال حميد محمد سلمان	25	1444
.A study to improve and assess an amalgam alloy (Iraqi product)	عبد الله عبد اللطيف مهدي	26	1445
.A study to assess the marginal integrity of Iraqi amalgam alloys(in vitro)	منار مظفر انورالنعمة	27	1446
A clinical study to compare the antibacterial activity of two different root canal irrigate	نوفل عبد المالك عبد الفتاح	28	1447
.A study to assess and improve a zinc phosphate cement(an Iraqi product)	لقاء عبد اللطيف	29	1448
A scanning election microscopic study to evaluate the large action of indigent solutions	حسنيين هادي جاسم الخفاجي	30	1449
Hits logical evaluation of the biocompatibility of glass lonomes-riluer cement in hamster mend	سعد رزوقي يوسف	31	1450
A comparative study to evaluate the effect of ultrasonic vibration on thiclueess of zinc phosphate	سعود عزيز ابراهيم الكوري	32	1451
.Scientific assessment of CL III cavity preparation for composite resin restoration	نكري محمد حاجم	33	1452
.In vitro study to compose the effect of chelating agent and other inigant solutions	جمال عزيز مهدي	34	1453
The effect of oblique valuation area on cement film thickness of zinc phosphate and glass ionomer	قيس جورج زيا	35	1454
The effect of smear layer removal on setention of titanium parallel sided screw posts cemented	جونى بطرس شمو	36	1455

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
A comparative study of fracture resistance of freshly endodontically treated teeth .restored	ضرار سليم الصفار	37	1456
.Assessment of micro leakage of amalgam restorations lined by silver varnish	عباس فيصل حسين الحويزي	38	1457
In vitro study to compare the effect of different types of endodontic sealers on the .apical seal of obturated root canals	علي رستم ناصر	39	1458
.An evaluation of the apical seal of retrograde amalyem filling using different liners	علي مصلح هندي	40	1459
.The effect of vibration on retention of complete crowns using different coments	احمد طارق حياوي	41	1460
A study of the effect of smear layer removal on the marginal seal of composite resin .materials	بدور محمد علي العزاوي	42	1461
.Evaluation of the effs.ects of a bonding system for amalgam repair	أسراء نزار محي الدين	43	1462
.An assessment of micro leakage at enamel composite resin in terface using solopond	سعد زبار عزيزان الحمداني	44	1463
An assessment of the surface character rustics of Iraqi dental amalgam alloy al .mansour with the aid of profilometer and scanning election	رعد عبد الهادي العبدلي	45	1464
.The effect of ultra sonic vibration on porcelain and acrylic surface	مصعب حميد سعيد	46	1465
The effect of mechanical and thrmal removal of gutta-percha for immediate and .delayed dowel	حكمت عبد الرحيم شفاتني	47	1466
A study to compare the use of different files in simulated awned canal .instrumentation	هبة البرت رسام	48	1467
Evaluation of some mechanical properties of two Iraqi amalgam alloy	هيثم بونس محمد	49	1468
In vitro study on the retention of composite resin restoration using deutine bonding agents and pains.	قصي عبد الرزاق فاضل	50	1469
A comparative study to assess corrosion behavior of Iraqi amalgam alloys.	عبد الرحمن محمد صالح	51	1470
Profilometric study of the surface characteristics of rorcelain using different glazing polishing.	ماهر مصطفى التميمي	52	1471
In vitro study to compare the effect of two different concentrations of carbamide peroxide.	سعد يوسف يعقوب	53	1472
An evaluation of the effect of an air-powder polishing device (air flow handy) on crown	محسن علي يحيى	54	1473

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
Effect of new adhesive system on the retention of amalgam box restoration.	عمار عبد الستار الاوسي	55	1474
Cornal micro leakage of root canal filled teeth pretreated with ferric-oxalate or dentin bonding agent.	سهاد جبار حمد الشمري	56	1475
An assessment of micro leakage of three different base materials under amalgam restoration.	علي ممدوح عبد الكريم :	57	1476
Evaluation of the effects of cavity designs and adhesive systems on the retention of amodified.	زينب محمد حسين	58	1477
Evaluation of shear band strength of different restorative materials with adhesive bands.	عبد المنعم سلمان الخفاجي	59	1478
in vitro study to compare the effect of two differentbleaching agents on the shear bond strength of composite resin to human enamel tooth surface	وليد موفق خليل	60	1479
An evaluation of the effect of air -flow handy jet on enamel and restorative materials.	نائل حسن احمد	61	1480
comparative study of endodontic instrumentation methods simulated curved canals using stainless steel and nickel titanium k files.	عادل عبد الرب الأمي	62	1481
In vitro assessment of the cytotoxicity of four root canal sealers	رعد احمد حسين	63	1482
in vitro study to compare the sealing ability of ahydroxyapatite endodontic sealer with other sealers (quantitive measurement).	رغد عبد الرزاق	64	1483
Evaluation of the effect of metal etching and type of cement on the retention of cast posts.	مازن جلال حمدي	65	1484
A comparative study on the retention of complete cast crowns using different luting cements.	علي عبد الوهاب رزوقي الشبخني	66	1485
Micro leakage assessment of bonded courentional amalgam restorations located at enqmel root surface.	محمد منذر عبد الرزاق العيوسي	67	1486
Effect of types of core materials on the bonding strength of cast crowns using different cements.	عبد الله محمد وجيه الشماع	68	1487
Stereomicroscopic evaluation of the wear characteristics of stainless steel oral nickel-titanium endodontic files in curved canal.	ريما سمير مجيد	69	1488
an assesment of marginal leakage of classII composite resin restoration using T.M.S. pins	إسراء عوض الأيوبي	70	1489
reinforcing effect of adhesive bonding system. Restorative technique on cuspal fracture resistance	ماهر مهدي صالح	71	1490
The effect of amalgam condensation techniques on the shear bond strength using different dentin.	راند فاهم سلمان	72	1491

موضوع الأطروحة	اسم الطالب	ت	ت الكلي
An assessment of class cavity design using composite filling material.	فاضل سلمان عبد القتي	73	1492
An evaluation of antibacterial action for some endodontic sealers on microorganisms isolated.	هلال عطا عبد المجيد	74	1493
An evaluation of the effect of tooth brush-dentifrice abrasion on the surface roughness.	قصي أمجد انور	75	1494
an in vitro tudy to evaluate the occluding effect of sensoyne with strontium chloride on microleakage through exposed dental tubules of endodontically treated teeth.	سمير أسحق كدو	76	1495
Fracture resistance of endodontically treated teeth restored by prefabricated posts using.	فريد غياث نعمان	77	1496
The effect of antimicrobial agents when are used in dental unit water lines ondin time.	حمزة حسان عجزيني	78	1497
In vitro study to compare the effect of different vehicles on the diffusion of calcium and hydroxyl ions from Ca(OH) ₂ non-setting pastes through radicular dentin and cementum.	رعد نعمة دايم	79	1498
evaluation of microleakage in recent posterior composite resin.	قيس رعد عبد المجيد	80	1499
Stereomicroscopic evaluation of the effect of two methods of sterilization on the wear character.	دعد اسعد غوثاني	81	1500
The influence of surface loading and curing time on some mechanical prodertles of composite.	وائل راغب عثمان	82	1501
Shear bond strength of bonded amalgam cores with different types of pins.	علي عبد المنعم عبد الجبار	83	1502
A comparative study of the relative efficiency of different solvents used in softening gutta-percha root canal filling material.	ايمان محمد احمد الزقة	84	1503
The influence of tooth surface roughness on retention of complete cast crowns by using 2 different luting agents	زينة طارق عبد الهادي	85	1504
Evaluation three body wear in direct post wear in direct posterior filling material.	رباب ابراهيم احمد	86	1505
an evaluation of the effect of different levels of dentin sections on the shear bond strength of different restortive systems	نوفيا هامبرسوم ميناس	87	1506
An evaluation of marginal fit changes of porcelain-fused-to-metal crowns in relation to alloy type and finishing line.	حيدر حسن جاسم	88	1507
Evaluation of the amount of apicaaly extruded dentin debries using four instrumentation techniques. An invetro study	سامر يوسف كلو	89	1508
The relationship between cure depth and absorption coeicent of visible-light activated resin.	خلدون زياد عبد اللطيف الشريف	90	1509

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
The effect of 10% carbamide peroxide bleaching agent on some mechanical properties of composite resins (invitro study)	زاهرة عبد الجبار	91	1510
The effect of Ariston phc composite restoration in controlling the salivary phlerel and its.	عمر طه تايه التعييمي	92	1511
astudy to compare the effect of four instrumentation techniques on the shape of simulated curved canals.	نوفل رضا جواد الهاشمي	93	1512
The shear bond strength of an immediate on delay repaired light-cure composite restoration.	انغام غياث خليل الهاشمي	94	1513
The effect of adhesive system on marginal leakage of glass II compound amalgam-compostite.	منهل عبد الرحمن مجيد	95	1514
The effect of 10%carabamide peroxide bleaching agent on mercury release from dental amalgam.	أنس فلاح مهدي	96	1515
Evaluation of shear bond strength of resin bonded bridges using four different metal surface treatments an in vitro study.	سهاد شحادة يوسف الفقيه	97	1516
As conning electron microscopic evaluation of the resin-infiltrated layer in dentin using different adhesive bonding agents .	نبراس طالب علي القريني	98	1517
a study to compare the sealing ability of different root canal apical plug materials (in vitro)	زيد طارق طاهر الوهب	99	1518
Evaluation of the sealing ability of different materials used to repair fucle perforation in vitro study.	وفاء حسن عبدة الاعجم	100	1519
Quantification of extruded apical debris during root canal instrumentation using different technique an in vitro study.	سيف العرب عبد الغفور محمد	101	1520
Evaluation of antimicrobial efficiency of gatla pereha points with active futra canal medications.	وليد حمزة حسين العبيدي	102	1521
composite resin bonding to laser-modified human enamel surface	ذو الفقار غالي مجيد الخفاجي	103	1522
Evaluation of the effect of engenol-containing and eugenol free temporary filling on shear bond strength of composite restoration to dentin using two methods of bond application.	فراس جلال محمود محمد	104	1523
Evaluation of the ability of different restorative materials to close perforated porcelain fto metal specimens.	محمد محمد المعظم	105	1524
Effect of local in the development of abstraction finite element stress analysis study.	عبد السلام رشيد خدادادي	106	1525
the evaluation of vertical marginal discrepancy induced by using as cast and as received base metal alloys by different mixing ratios for construction of porcelain fused to vatal copings	سعدى شرشاب نياي	107	1526
Evaluation the shear strength of the internal porcelain repair system with different surface treatment.	خالد علي هادي الجعفري	108	1527

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
evaluation of the sealing abilities of different materials used to repair furcal perforation	رضوان عبد الله علي	109	1528
A study to compare the effect of three instrumentation techniques on the apical seal of obturated curved canals .	سمر أحمد ظاهر	110	1529
Reinforcement of undermined casps with composite resin in amalgam restorations	محمد قاسم غلام	111	1530
An evaluation of microleakage in two different types of composite resins with & without megafilm glass ceramic insert	سنان عبد الرزاق سالم	112	1531
An assessment of the effect of using different post systems of the fracture resistance of endodontically treated teeth	لميس عبد الحميد ناجي	113	1532
Evaluation the release of hydroxyl and calcium ions from low calcium hydroxide containing material	ميلاد طالب حميد الطائي	114	1533
Evaluation of shear bond strength composite to newly condensed and set amalgam by using two adhesive systems.	أحمد حامد علي	115	1534
Comparison the effect of different surface treatment techniques on the shear bond strength of resin bonded bridges using two different base metal alloys.	نبري فخر صالح محسن	116	1535
A comparison of spread penetration depth and load required in lateral condensation technique	سهى فاضل دليمي	117	1536
Effect of using different photactivated methods on the curing depth of light activated resin composites	أحمد صليبي مصطفى	118	1537
Comparison between the influence of water aging on some properties of two types of composite resins	فراس صدام عكة	119	1538
Different base materials insulating efficiency against visible light warming effect	كريم نصر عبد علي	120	1539
A comparison between the effect of two etching modalities on shear bond strength of two restorative systems.	مثال فاضل شاكر	121	1540
An evaluation of the effect of different polishing agents on the surface roughness of porcelain	رواء حكمت عمر	122	1541
The influence of dietary simulating solvents on a recent composite topography.	شهد محمد علي	123	1542
Evaluation of different surface treatments on the shear bond strength of composite to porcelain and base metal.	همسة هاشم مزعل	124	1543
Evaluation of vertical marginal discrepancy induced by using three different phosphate bonded investment for porcelain fused to metal copings.	احمد غازي صبحي	125	1544
Evaluation of the micro leakage of different restorative materials used to repair a perforation in metal cast (nickel-chromium).	زينب يوسف محسن	126	1545

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
An evaluation of apical seal in endodontically filled teeth using different instrumentation technique & spreaders.	ايناس ياسم محمد	127	1546
An evaluation of micro leakage of composite restorative materials used to seal perforated porcelain fused to metal specimens.	عماد فرحان علي	128	1547
Evaluating the effect of collagen removal on shear bond strength of dentin adhesive system.(using NaOCI treatment)	رقية عبد الوهاب	129	1548
Marginal leakage of an immediate and delay repaired light –cure composite restoration with different surface treatment.	وجدان عبد الأمير كاظم	130	1549
Evaluation of the shear bond strength of intra oral porcelain repair system after using different air abrasion time and curing system .	عبد الستار محمد الصكر	131	1550
Evaluation of fluoride release from different restorative materials and inhibitory effect on artificial secondary caries extension.	تارا سردار عبد الخالق	132	1551
The influence of different light curing systems on micro leakage of composite resin and on heat generation.	شذى عبد الله صالح	133	1552
An evaluation of dentin shear bond strength of fluoride releasing restorative materials.	عطاراد عبد العزيز حسن	134	1553
An evaluation of temperature rise inside pulp chamber of the tooth during dentin channels preparation using two size of twist drills at two variants speeds.	بسام أفرام محمد	135	1554
A clinical study to evaluate the efficiency of two different types of apex locators.	فراس إبراهيم هاني	136	1555
A comparison of inferior alveolar nerve block and periodontal ligament injections during endodontic treatment of human mandibular first premolar	وليد أحسان علي	137	1556
The effect of curing times and photo activation-methods on the wear rate of light activated resins.	سحر سمير فتوحى	138	1557
Finit element stress analysis of endodontically treated teeth restored prefabricated posts.	بلند محمد سليم	139	1558
Evaluation of the effect of different concentrations of canbamide peroxide on the sealing ability of different bonding agent and the amount of peroxide reaching the pulp chamber	صلاح أياد كاظم	140	1559
An evaluation of the effect of surface treatments on amalgam repair (in vitro study).	بيداء محمود زيدان	141	1560
An evaluation of the effect of new modified carisolve gel on micro leakage of composite restorative material with two different bonding agents and iffernt aging periods	زينب محمود منسى	142	1561
An evaluation of the effect of different polishing materials and glazing techniques on fracture toughness of dental porcelain	سعيد كامل سعيد	143	1562
The influence of caries deteeter dye on shear bond strength of dentin using two dentin adhesive systems	سلمى عيسى دهيم	144	1563

موضوع الأطروحة	اسم الطالب	ت	ت الكلي
Effect of thermal cycling on shear bond strength of porcelain fused to titanium and Ni/Cr alloy using shear test.	سنان سامي جميل	145	1564
An evaluation of the effect of curing systems and water storage on the fracture toughness of two types of composite resin filling materials with different organic matrix composition	زهراء نزار محمد	146	1565
The effect of restorative materials and cavity preparation on the young's modulus elasticity for premolars.	أيمن حكمت بهنام	147	1566
An evaluation of coronal micro leakage in endodontically treated teeth using two different obturating techniques and two types of sealers at four different time periods	محمد خالد مكي	148	1567
Shear bond strength of porcelain fused to recast nickel-chromium alloys.	عارف سلمان حميد	149	1568
A clinical comparison between maxillary and mandibular posterior teeth using local anesthesia.	رعد سعيد عبد الحميد	150	1569
The effect of four types of photo-activation devices on flexural strength of two types of composite restorative resins	كاظم علي حسين	151	1570
Evaluation of shear bond strength of composite resin bonded to CO ₂ -laser-treated dentin with three different adhesive systems	هدى عباس عبد الله	152	1571
An assessment of the effect of sodium ascorbate antioxidant on the bonding strength of composite resin to the bleached enamel surface	أسيل عبد الأحد كوركيس	153	1572
Evaluation of the effect of ethyl cyanoacrylate adhesive on marginal seal of composite and amalgam restorations.	أمير حمدي حكيم	154	1573
Influence of different photo-activation methods on the shear bond strength of composite resin to dentin.	صبيحة مهدي كتعان	155	1574
Influence of different metal surface treatments on shear bond strength of commercially pure titanium and Ni-Cr alloy on resin bonded bridge	محمد مزبان خضر هادي	156	1575
A comparison of four types inlay materials fracture strength.	وسام عادل نجم	157	1576
Evaluation of the effect of dentin treatment with CO ₂ laser and air abrasion on the micro leakage of composite restorations	ندى علي مهدي	158	1577
The effect of dowel space preparation on the apical seal of resin gutta-percha obturation materials	صالح موفق فاضل	159	1578
The influence of different root canal medicaments on the tensile bond strength of composite resin to coronal dentin by using 7th generation bonding agent.	محمد أكرم محمد	160	1579
The influence of three different photo-activation methods and polishing on wear resistance of two types of composites	زينب محمد كامل	161	1580
Evaluation of sodium ascorbate effect on shear bond strength of dual cure resin cement to radicular dentin treated with NaOCl.	حسام نبيل داوود	162	1581

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
The effects of two bleaching agents on microhardness and surface roughness of composite resins.	ميساء صبار سلمان	163	1582
A comparison and evaluation of the effects of different compaction techniques on fill density and apical seal of gutta percha root canal filling	علي كاظم سريح	164	1583
Shear bond strength of endodontic sealers to dentin and gutta-percha (in vitro study)	ميعاد عبد الرزاق حمود	165	1584
An evaluation of the effect of modified carisolv gel on shear bond strength of repaired light cure composite and compomer restorations.	رشا حميد جهاد	166	1585
The adapt ability of three different gutta-percha obturation techniques: thermafil system, system B/obturation, and lateral condensation.	سامر عون نياي	167	1586
Effect of saliva contamination on the shear bond strength of composite resin to dentin.	ممدوح سمير مهدي	168	1587
Storage effect on shear bond strength of four types of adhesive generations (in vitro study).	سميرة جميل جوشي	169	1588
Effect of soldering on shear bond strength of porcelain fused to metal (in vitro study).	أحمد غاتم مهدي	170	1589
Evaluation of the effect of surface roughness of glazed and polished porcelain on adhesive of oral streptococcus mutans .	معن ابراهيم خليل	171	1590
Influence of cross sectional surface area and different bonding mechanisms on shear bond to dentine	صفاء باقر طاهر	172	1591
Pulp tissue reaction of rats teeth to polyphosphate glass ionomes filling material.	محمد عبد الحافظ يوسف	173	1592
Antibacterial efficiency of ozonated water and its effect on dentin shear bond strength.	حسنين مصطفى حبيب	174	1593
Comparison between hand and rotary protocol instrument with hand K-flexo file in the preparation of curved root canals.	هيثم داخل محسن	175	1594
Comparison of shear bond strength of Z current adhesive system to enamel, dentin and DEJ region using Z load application methods.	بان محمد جاسم	176	1595
The effect of delay of dowel space preparation on the apical seal of four obturation technique	علي حسن عبد الغني	177	1596
A comparative study on surface treatment with air abrasion and ND-YAG laser beam on shear bond strength of aged repaired composite with two bonding system.	مها عدنان حبيب	178	1597
The effects of anti-oxidant agents as neutralizers of bleaching agents on dentin bond strength.	ايداد محمود عبد	179	1598
Comparative study on the shaping ability of rotary nickel-titanium Ks and hand shaper instruments compared with stainless steel hand-k-flexo file in simulated curved canals	نصر عز الدين احمد	180	1599

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
The effect of an environment on the micro leakage of different root-end filling materials.	حيدر عبد الرضا محمد	181	1600
A comparative study on the shaping ability of three endodontic rotary Nickel-titanium systems and stainless-steel hand k-fexofile in simulated curved canals.	حامد قاسم محمد حسين	182	1601
The effect of modified carisolve gel on micro leakage of repaired aged composite restoration using different bonding ssysytems.	عمار عزيز لطيف فاضل	183	1602
An evaluation of the antimicrobial activity of fine endodontic sealers .	عامر عباس محمد	184	1603
A study to evaluate the effect obturation technique on sealer cement thickness and dental tubule penetration.	ايداد محمود عبد اللطيف	185	1604
Comparative study of apical extrusion of intracanal bacteria using different instruments and instrumentation technique.	محمد رشيد حميد	186	1605
A comparative study to evaluate the effect of immediate versus delayed dowel space preparation on the apical seal of epiphany obturation system with different obturation techniques.	سمر عبد الحميد ياسين	187	1606
The effect of cleaning and sterilization on the trossional protaper rotary niekel titanium endodontic instrument.	يحيى عادل عبد مطلق	188	1607
Influence of silanization on tensile strength and the relation of glass fiber post in weaken endodontic treated teeth reinforced with packable composite.	بهاء عبد الرزاق جري	189	1608
The influence of two chelating agents used in two different working times on the micro leakage of packable composite resin used in post space.	حسن جميل عبد الواحد	190	1609
shaping ability of three rotary NiTi systems :Mtwo,k3,protaper in simulated curved canals	علياء محسن جبار	191	1610
A comparative study of apical micro leakage by using different preparation and obturation techniques.	مرفت مأمون رشاد	192	1611
The adaptability of three different gutta-percha abjuration techniques: thermopile, soft care (regular) soft care (low heat) of two different sizes.	سعد عبد الباقي رمضان الربيعي	193	1612
The effectiveness of rotary and hand instrumentation on the removal of gutta-percha during endodontic retreatment using two types solvent.	ايمان جرجيس احمد	194	1613
The influence of different light curing systems with different curing depth on the micro hardness of packable composites.	الاء جواد كاظم	195	1614
Effect of three types of mouth rinses and human saliva on micro hardness and color stability of packable and non composite resins.	نغم عبد الهادي الحويالي	196	1615
An evaluation of the use of different sizes and techniques of thermoplasticized obturations on the apical seal.	ثناء غني نعمة	197	1616
The influence of flowable composite liner on micro leakage of class II packable composite resin restoration with different application techniques.	جلال بيستون القلمجي	198	1617

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
The influence of adhesive systems on bond strength between erb post and packable composite resin.	هبة عبد الكريم سلمان	199	1618
The effect of cyclic immersion in cola drink on the surface micro hardness and surface roughness of different composite resin filling materials.	علي سعد ابو نايلة	200	1619
Evaluation the effect three endodontic sealer on the retention of cost posts cemented with resin cement.	عتاب ناصر حسين	201	1620
A study to compare the effect of different irrigant solutions on the sealing ability of obtore teed root canals.	قيس فاروق فوزي	202	1621
Comparative study of apical extrusion of intracanal bacteria using different instruments and instrumentation technique.	لنز علي شعلان ابرام	203	1622
Fracture resistance of weakened premolar teeth restored with different composite materials and techniques.	شمام أنيس صاحب	204	1623
surface deterioration of new silorane in comparision to methacrylate -based composite materials after simulated tooth -brushing	احمد ساطع رافت	205	1624
comparision of the efficiacy of three different techniques in the removal of gutta-percha and two types of sealers during endodontic retreatment	مروان زياد عبد جبار	206	1625
cuspal defelection in premolar teeth restored with a silorane and a dimethacrylate -resin based composite	اياذ مؤيد محمود	207	1626
comparision of bond strength in different levels of post space of fiber -reinforced post luted with different resin cements	احمد فاروق محمد	208	1627
the eeffect of low shrinkage dental composite on the fracture strength of weakened premolar teeth	رشا عزت سهيل	209	1628
an evaluation of the sealing ability of different obturation and gutta-percha removal techniques	علاء مهدي محمد علي	210	1629
an evaluation of apical microleakage in roots filled with thermoplastic synthetic polymer base root canal filling material(real seal 1 bonded obturation)	نادين جمال عبد الرضا	211	1630
astudy to compare the cleaning efficiency of three different irrigation devices at different root canal levels	علي هاني حسن	212	1631
push out bond strength of different obturation systems	ياسمين حسن مطيع	213	1632
the eeffect of resilon system on the fracture resistance of endodontically treated roots using two instrumentation techniques	سنان عبد الستار شويلية	214	1633
comparision of regional bond strength o fpost space of fiber-reinforced post luted with two types of cement at ifferent testing times	ميس نبيل عبد الفتاح	215	1634
the influence of instrument application frequency on apical extrusion of debris using rotary portaper ,hand protaper and hybrid technique	زيد قاسم عزيز الدوري	216	1635
the effect of curvature angle and rotational speed on the cyclic fatigue of three types of endodontic rotary instruments	ثائر عبد الكريم مخلف	217	1636

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
evaluation of the effect of root canal preparation size and flaring on the depth of irrigant penetration	ندى عبد المنعم عاجل	218	1637
a comparision of vertical marginal fit of three different types of all -ceramic crown restoration	ستار جبار الحميدات	219	1638
the influence of CAD\CAM ceramic and heat processed composite inlays on the fracture resistance of premolars	هدى احمد عبدالله	220	1639
the effect of different finishing and polishing systems on surface roughness of new low polymerized composite materials	مصطفى رشاد عبد الرزاق	221	1640
of the effect of intermediate agents on the shear bond strength of repaired aged silorane resin composite	هناء عبد الجبار صالح	222	1641
the effect of different acidic enviroments on te apical microleakage of different obturation techniques	اريج رياض ابراهيم	223	1642
a study to compare the efficiency of different instrumentation systems for cleaning oval-shaped root canals	طي حاتم كاظم	224	1643
fracture resistance of endodontically threated premolars with extensive MOD cavities restored with different composite restorations (an invitro study)	اوس حسن عطية	225	1644
comparsion of fit among different types of post restorations luted with conventional cement	احسان صباح صاحب المستوفي	226	1645
marginal leakage of amalgam and modern composite materials related to restorative techniques in class II cavity(comparative study)	محمد خليل صباح	227	1646
an evaluation of the influence of different finishing lines on the fracture strength of full contour zirconia CAD/CAM and heat press all ceramic crowns(invitro study)	احمد ابراهيم خلف	228	1647
evaluation of antibacterial action of photosensitizer solution activated by diode lamp and three intracanal medicants (in vitro study)	محمد جواد هريس	229	1648
the effect of thermocycling on microleakage analysis of bulk filled base composite in comparison to incrementally placed nanohybrid composite in class II MOD restorations(in vitro study)	لينا علي حسن	230	1649
the effect of office bleaching on surface roughness and microhardness of newly developed composite materials	نور سلمان ناظم	231	1650
the influence of recent direct restorative composite resin and techniques on caspal deflection of premolars (comparative study)	خالد وليد ابراهيم هنودي	232	1651
	علي سعد حسن عباس	233	1652
Evaluyation of gutta-percha penetration depth into simulated lateral canals nsing rhree different obturation techniques (A comparative study)	محمد قاسم محمد	234	1653
The influence of recent adhesive onlay techniques on the fracture resistance of endodontically treated premolars (an in vitro study)	زينب شاكر أموري	235	1654
A study to compare The Efficiency of Different Irrigation Systems for Macro Debris Removal in Instrumented Canals (An InVitro Sudy)	حسين علي حسين الجميلي	236	1655
Evaluyation of Fracture Strength of Endodontically Treated Teeth Restored By Mocked Zirconia Post and Core With Different Post And Core Systems (An In Vitro Comparative Study)	هدى مساعد لفته	237	1656
Analysis of the tomographic density and the sealing ability of GuttaFlow versus AH26 root canal sealers using three obturation techniques (An in vitro study)	احمد مثنى جاسم	238	1657
the effect of smear layer on push- out bond strength to dentin of bioceramic saler (in vitro study)	حامد عباس حامد	239	1658
comparison of regional regional bond strenth among different types posts luted with different types of cements (an in vitro study)	احمد عطا محميد حديد	240	1659
Evaluation of the cleaning efficiency of the isthmus using different rotary instrumentation techniques (In vitro study)	زهي اباد جابر ابراهيم	241	1660

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
the antibacterial evaluation extracts as root canal irrigation solutions (Acomparative study)	ندى اباد شفيق توفيق	242	1661
Effect of zirconia surface treatments on the shear bond strength of veneering ceramic	ايناس هادي كريم سهيل	243	1662
the Effect of Different finising lines on the marginal fit of full contour zirconia and gless ceramic cad /cam crowns (an in vitro study)	زياد عادل خليل	244	1663
evaluation of marginl gap at composite /enamelintreface in cless II composite resin restoration by sem after thermal and mechanical load cycling (An in vitro comparatve study)	ميس يعرب خماس	245	1664
the effect of light curing tip distance on the curing depth of bulk fill resin based composites	علي حسن مالمك الدباغ	246	1665
shear bond strength of endodontic sealers to dentin with and without smear layer and gutta - percha	رنا كاظم حسن كاظم	247	1666
the effect of varlous endodontdic irrigants on the sealing of biodentine and other root bepforation repair mepair ;In vitro study	احمد كاصد ثجيل	248	1667
fracture strength of laminate vaneers using different materials and techniques(A comoarativro study)	عبير غلب عبد الخالق	249	1668
Evaluation of shear bond strength ofzirconia to tooth structucturs by resin cementnt after zirconia different treatement techniques	ريم مؤنس داود يحيى	250	1669
fracture resistance of weakened premolars restored with sonically - activated composite bulk filled and incrementally -filled composities (A comparative in viitro study)	فاطمه فهد عبيد الخالدي	251	1670
effect of different polishing systems and giazing on the surface roughness of full-contour zirconia	حسين محمد وجيه مجيد	252	1671
effect of tea terr thymus vulgaris and nigella sativa olis on the eilmintion of enterococcus faecalis	رافد جهاد خلف	253	1672
effect of one yearof accelerated aging on the flourescence stability of different composites and dentael tissues	ساره كاظم	254	1673
the effect of porcelain veneering on marginal fitness of zirconia copared to full contour zirconia cronw using three differ	همسة زكي ناجي	255	1674
gingival maeginal leakage of different tooth colored materials combination as an Intermdieate layer in calss ii composites restoration	اسيل عبد الله صالح	256	1675
effcct of different surface treatments on the shear bond strenght of resin compostist to biodentine	علي صالح هادي	257	1676
the effect of porcelain veneering on marginal fitness of zirconia copings compared to full contour zirconia crown using three	همسه زكي ناجي عباس	258	1677
in vitro comparative assessment of composite nanoleakage using various dentne surface treatment	محمد حامد عبود معتوق	259	1678
shear bind strength between lithium disilcate ceramic and different luting cements with and without aging	عبد الله محمد حسين حميد	260	1679
comparaison of the marginal fitgnal of the ceramic crowns fabricated wuith cad/cam	اكرم محمد عبد الكريم عبدالله	261	1680
evaluating the internal and marginal fitness of zirconia substyustur when used as singl crown restoration or reteinar for three unit fized partial denture	عدي محمد غني عبود	262	1681
comparative evaluation of the effect of different universal adhesives and bonding techniques on the marginal gap of class composite	علي فاضل عباس مهدي	263	1682

موضوع الأطروحة	أسم الطالب	ت	ت الكلي
fracture resistance of endodontically treated premolar teeth with extensive mod cavities restored with different bulk composite restorations	بلال حافظ ابراهيم حبيب	264	1683
the effect of artificial accelerated aging on the color of ceramic veneers cemented with different resin cements	شذى خضر حسين نجيل	265	1684
evaluation of marginal adaptation of class v composite resin restoration with different surface treatments after thermal and mechanical load cycling	ديما ياسر اسماعيل	266	1685
margin and internal fitness of full contour cad-cad crowns fabricated from zirconia	سمر خالد العادل	267	1686
